Why choose...

Saratoga Safety Covers

- Offer the cover of your choice: automatic, semi-automatic or manual
- Open and close easily and quickly.
- Protect children from pool related accidents
- Protect the pool linings
- Prevent water evaporation
- Save chemicals
- Limit pool cleaning

You have designed and built the pool of your dreams to enjoy moments of peace and relaxation. Your pool is a source of pleasure and fun for you, your family and friends. So don't waste time cleaning it. Enjoy your pool without worrying.

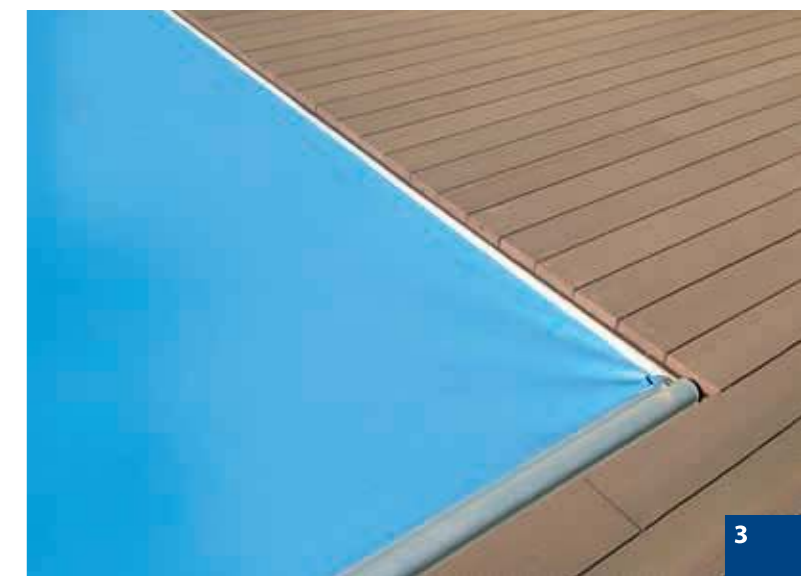

The SARATOGA Safety Covers are installed using high quality aluminum and stainless steel materials.

The canvas which is used is 650 gr/m² and Not 450 gr/m², which is used in other covers of the kind. High frequency welding machines with reinforcing band are used, giving the cover 10 - 20 times more endurance and weight resistance. The canvas is being polished so it can be cleaned easily without allowing debris to stick on it.

The use of sliders, instead of rollers, enables the cover to open and close easily and quickly. The automatic system is hydraulic and the electricity used for covering and uncovering the pool is installed away from the pool, ensuring the safety of those using it.

The new safety pool covers keep dirt, leaves and debris away from your pool. Simply close the cover whenever you don't use the pool, to keep it crystal-clear. The pool remains ready to swim at any time and you save money on chemicals. It also prevents the evaporation of water when the cover is on.

The covers offer safety for your family and friends and help prevent pool related accidents. With the new safety pool covers you save money, reduce pool maintenance and chemical use. You spend more time enjoying your pool without any worries.

Automatic - Hydraulic Safety Covers

Practical for everyday use

flush - under

The automatic pool cover is recommended by numerous pool constructors for its versatility and adaptability.

Enjoy ultimate ease and convenience with the turn of a key, preventing pool related accidents, which spoil the fun your pool provides.

- The automatic cover system closes easily in less than a minute, depending on the pool size.
- There are no electrical installations near the pool, since they can be installed as far as 50m away.
- It fits perfectly to most pool sizes and shapes.
- It can be installed underground or above ground.
- It locks for safety.

Mechanical Safety Covers

Be free from care

The Mechanical pool safety cover resembles the automatic system. It slides with the same ease and its simple design ensures long-term use without maintenance.

Due to its unique specifications, it is practical for everyday use. It can be transformed easily into an automatic system whenever you please.

- It slides and closes easily in 1.5 – 2.5 minutes, depending on the pool size.
- The Mechanical system can cover and uncover the pool mechanically using the same handles.
- It fits perfectly most pool sizes and shapes.
- It can be installed underground or above ground.
- Maintenance free.
- It locks for safety.
