History

Saratoga was established in 1989 with a mission to lead the way in the pool construction industry. We employ state-of-the-art techniques and materials to efficiently tend to the needs of the entire island with our exceptionally built and masterfully designed pools and spas.

We have installed and continue to maintain more than 5000 pools across the country, always delivering excellent results with the seal of Saratoga's expert craftsmanship.

About Saratoga

Saratoga is a premium pool and spa construction company providing pool building and construction across Cyprus. At Saratoga we have a passion for design, aesthetics and total customer satisfaction. We collaborate with top suppliers from Europe and the USA to provide you with the best products and services.

When you choose Saratoga, you are choosing an expert with the knowledge and expertise to transform your vision into a beautiful source of enjoyment for years to come.

Saratoga Pools

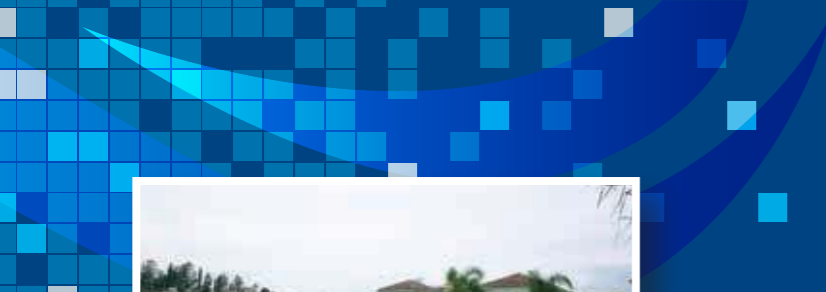

If you are dreaming of a great place to have fun and meet with family and friends, SARATOGA Pools can make your dream become a reality.

Swimming pools and spas bring years of enjoyment. They offer an opportunity to spend time with friends

and family or just to relax while providing much better health and fitness benefits.

With a SARATOGA pool, your property's value as well as its beauty will definitely increase!

Why choose a SARATOGA pool

SARATOGA Pools is the oldest and most reliable constructor of swimming pools on the island.

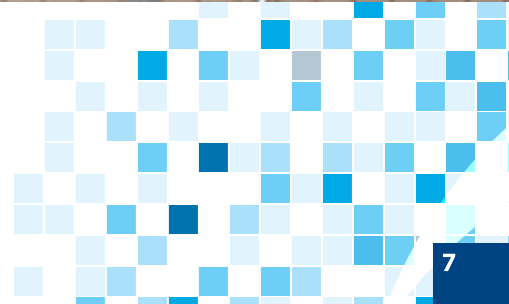

SARATOGA Pools can design and construct the swimming pool of your dreams, whatever the type or style you are aiming for, from the first stage of architectural integration into your building, up to the final delivery while you rest assured and keep your peace of mind.

Our aim is to make every customer satisfied, so we do our very best to guide the pool buyers through the process, making the right decisions and selections.

We cooperate with various suppliers from Europe and USA providing our clients with the highest quality of services.

SARATOGA Pools operates a well organised Maintenance and After Sales Customer Support Department.

The Maintenance Department is run by well qualified in the pool - related matters experienced technicians, who are at the customer's disposal throughout the year.

Saratoga Pools

Concrete construction for skimmer swimming pools
PVC Liner - Mosaic - Tiles

After chalking out the ideal location you have chosen for your pool, experienced excavators dig the proper depth and size of your particular design. Your yard begins its transformation!

Saratoga aluminium wall forms are erected, and steel reinforcement is placed.

Super Plast coat is smoothly placed over the pool walls and bottom to make the surface smoother for more protection of the PVC Membrane.

Installation of the patio around the pool.

A full 20cm thick concrete wall with footing is erected.

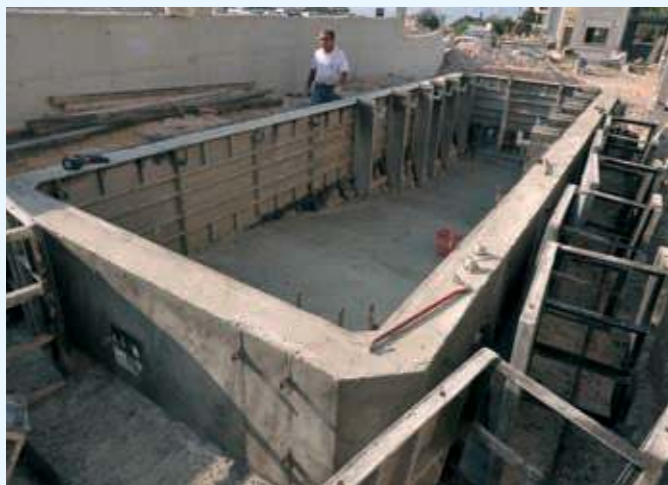

A concrete screed is poured in the pool bottom.

The PVC Membrane is secured into the bead receptor, turning the super-structure into a beautiful, virtually maintenance free interior surface, firm and smooth to the touch.

Installation of the pool's filtration.

Saratoga aluminium wall forms are removed. A smooth, full 20cm thick seamless reinforced concrete pool structure is formed to last for centuries.

Installation and pressure testing of the pipe system for inlet fittings and skimmer.

Your SARATOGA pool is complete. Just add water, and get ready for fun.

SARATOGA pool safety cover keeps your pool clean all year around.

Skimmer Type Swimming Pool

Overflow Type Swimming Pool

SARATOGA Pools offers many choices with high efficiency, technology and aesthetics. Crystal-clear water and impressive atmospheres are facts for SARATOGA pools.

Our company provides the most appropriate materials for the construction of swimming pools. The reinforced concrete wall is an ideal and durable material for the pool, strong enough to last for generations and also ensures that there will be no leaks in any case.

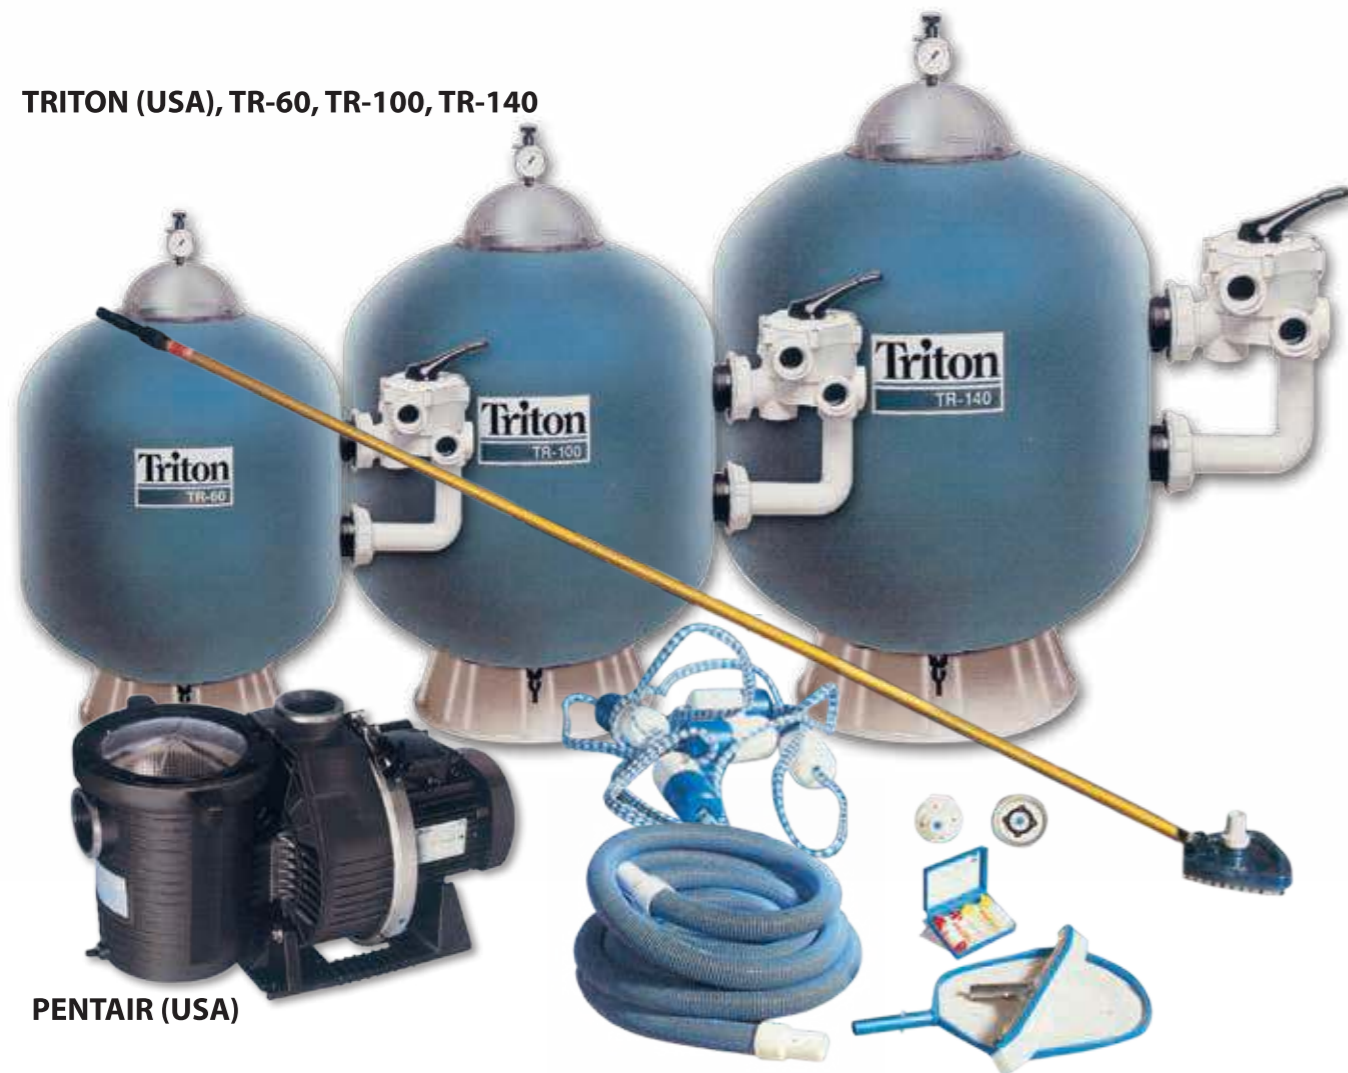

The interior design of Saratoga pools is by far the best. The PVC Membrane, made from the finest vinyl available, guarantees perfect water tightness. PVC Membrane is the most economical solution with a long life period. A variety of colours and patterns allow you to customize your pool.

If you're thinking of getting a pool, make sure it's a Saratoga pool. After all, you want it to be around for all your life.

SARATOGA Pumps & Sand Filters

Saratoga Pools

TRITON (USA), TR-60, TR-100, TR-140

PENTAIR (USA)

Saratoga Pumps

The heart of the pool system is the water pump. Saratoga pumps are designed for most domestic pool filtration applications. The high performance pump is manufactured from a premium grade UV stabilised reinforced thermoplastic, coupled to a corrosion resistant marine grade aluminium motor housing, incorporating, as standard, a heavy duty cast iron end-shield for quieter running and extended bearing life.

Saratoga Sand filters

These sand filters are constructed by the latest engineering technology. Fiberglass reinforced sand filter tank with unequalled strength and durability. These sand filter systems are equipped with side mounted multiport valves and centrifugal pump.

- sand filter has excellent chemical-corrosive resistance.
- spherical tank with uniform wall thickness.
- all sand filters come with a pressure gauge.

1. FILTER

Saratoga swimming pool is equipped with sand filter offering efficiency and outstanding water clarity.

2. WATER PUMP & MOTOR

The heart of the pool system is the water pump. Saratoga pumps are so convenient, reliable and quiet they often go unnoticed.

3. REINFORCED CONCRETE WALL

The 20cm of Saratoga monolithic reinforced concrete offers strength and long lasting life.

4. REINFORCED CONCRETE WALL FOOTING

Strong reinforced concrete wall footing supports pool walls and allows true wall alignment. This unyielding, proven support system is designed specifically to provide maximum strength at all stress points.

5. SKIMMER

A moulded, non-corrosive automatic skimmer helps to keep the water's surface free of debris.

6. CENTER STEP HANDRAIL

For maximum safety and classic elegance, SARATOGA pool steps include a bright, stainless steel handrail.

7. STEPS

Choose from an array of step designs. Saratoga steps are a safe, slip-resistant way in and out of your family's pool and built to last a lifetime.

8. INLET FITTINGS

Fully adjustable wall fittings that direct the filtered water flow to any area of the pool for proper circulation.

9. POOL LADDER

A stainless steel, 3 step pool ladder allows ease of entry and exit from your pool.

10. BOTTOM DRAIN

To maximize water flow and circulation, a bottom drain is added to the pool.

11. UNDERWATER LIGHTING

Pool lighting can give you more time to swim safely in your pool and create a great ambience at night. We have a range of products that will brighten up your pool in the dark and give it a luxury and a sophisticated look.

12. DIVING BOARD

An entertaining, optional accessory for diving. It can only be installed after taking into consideration the safety regulations.

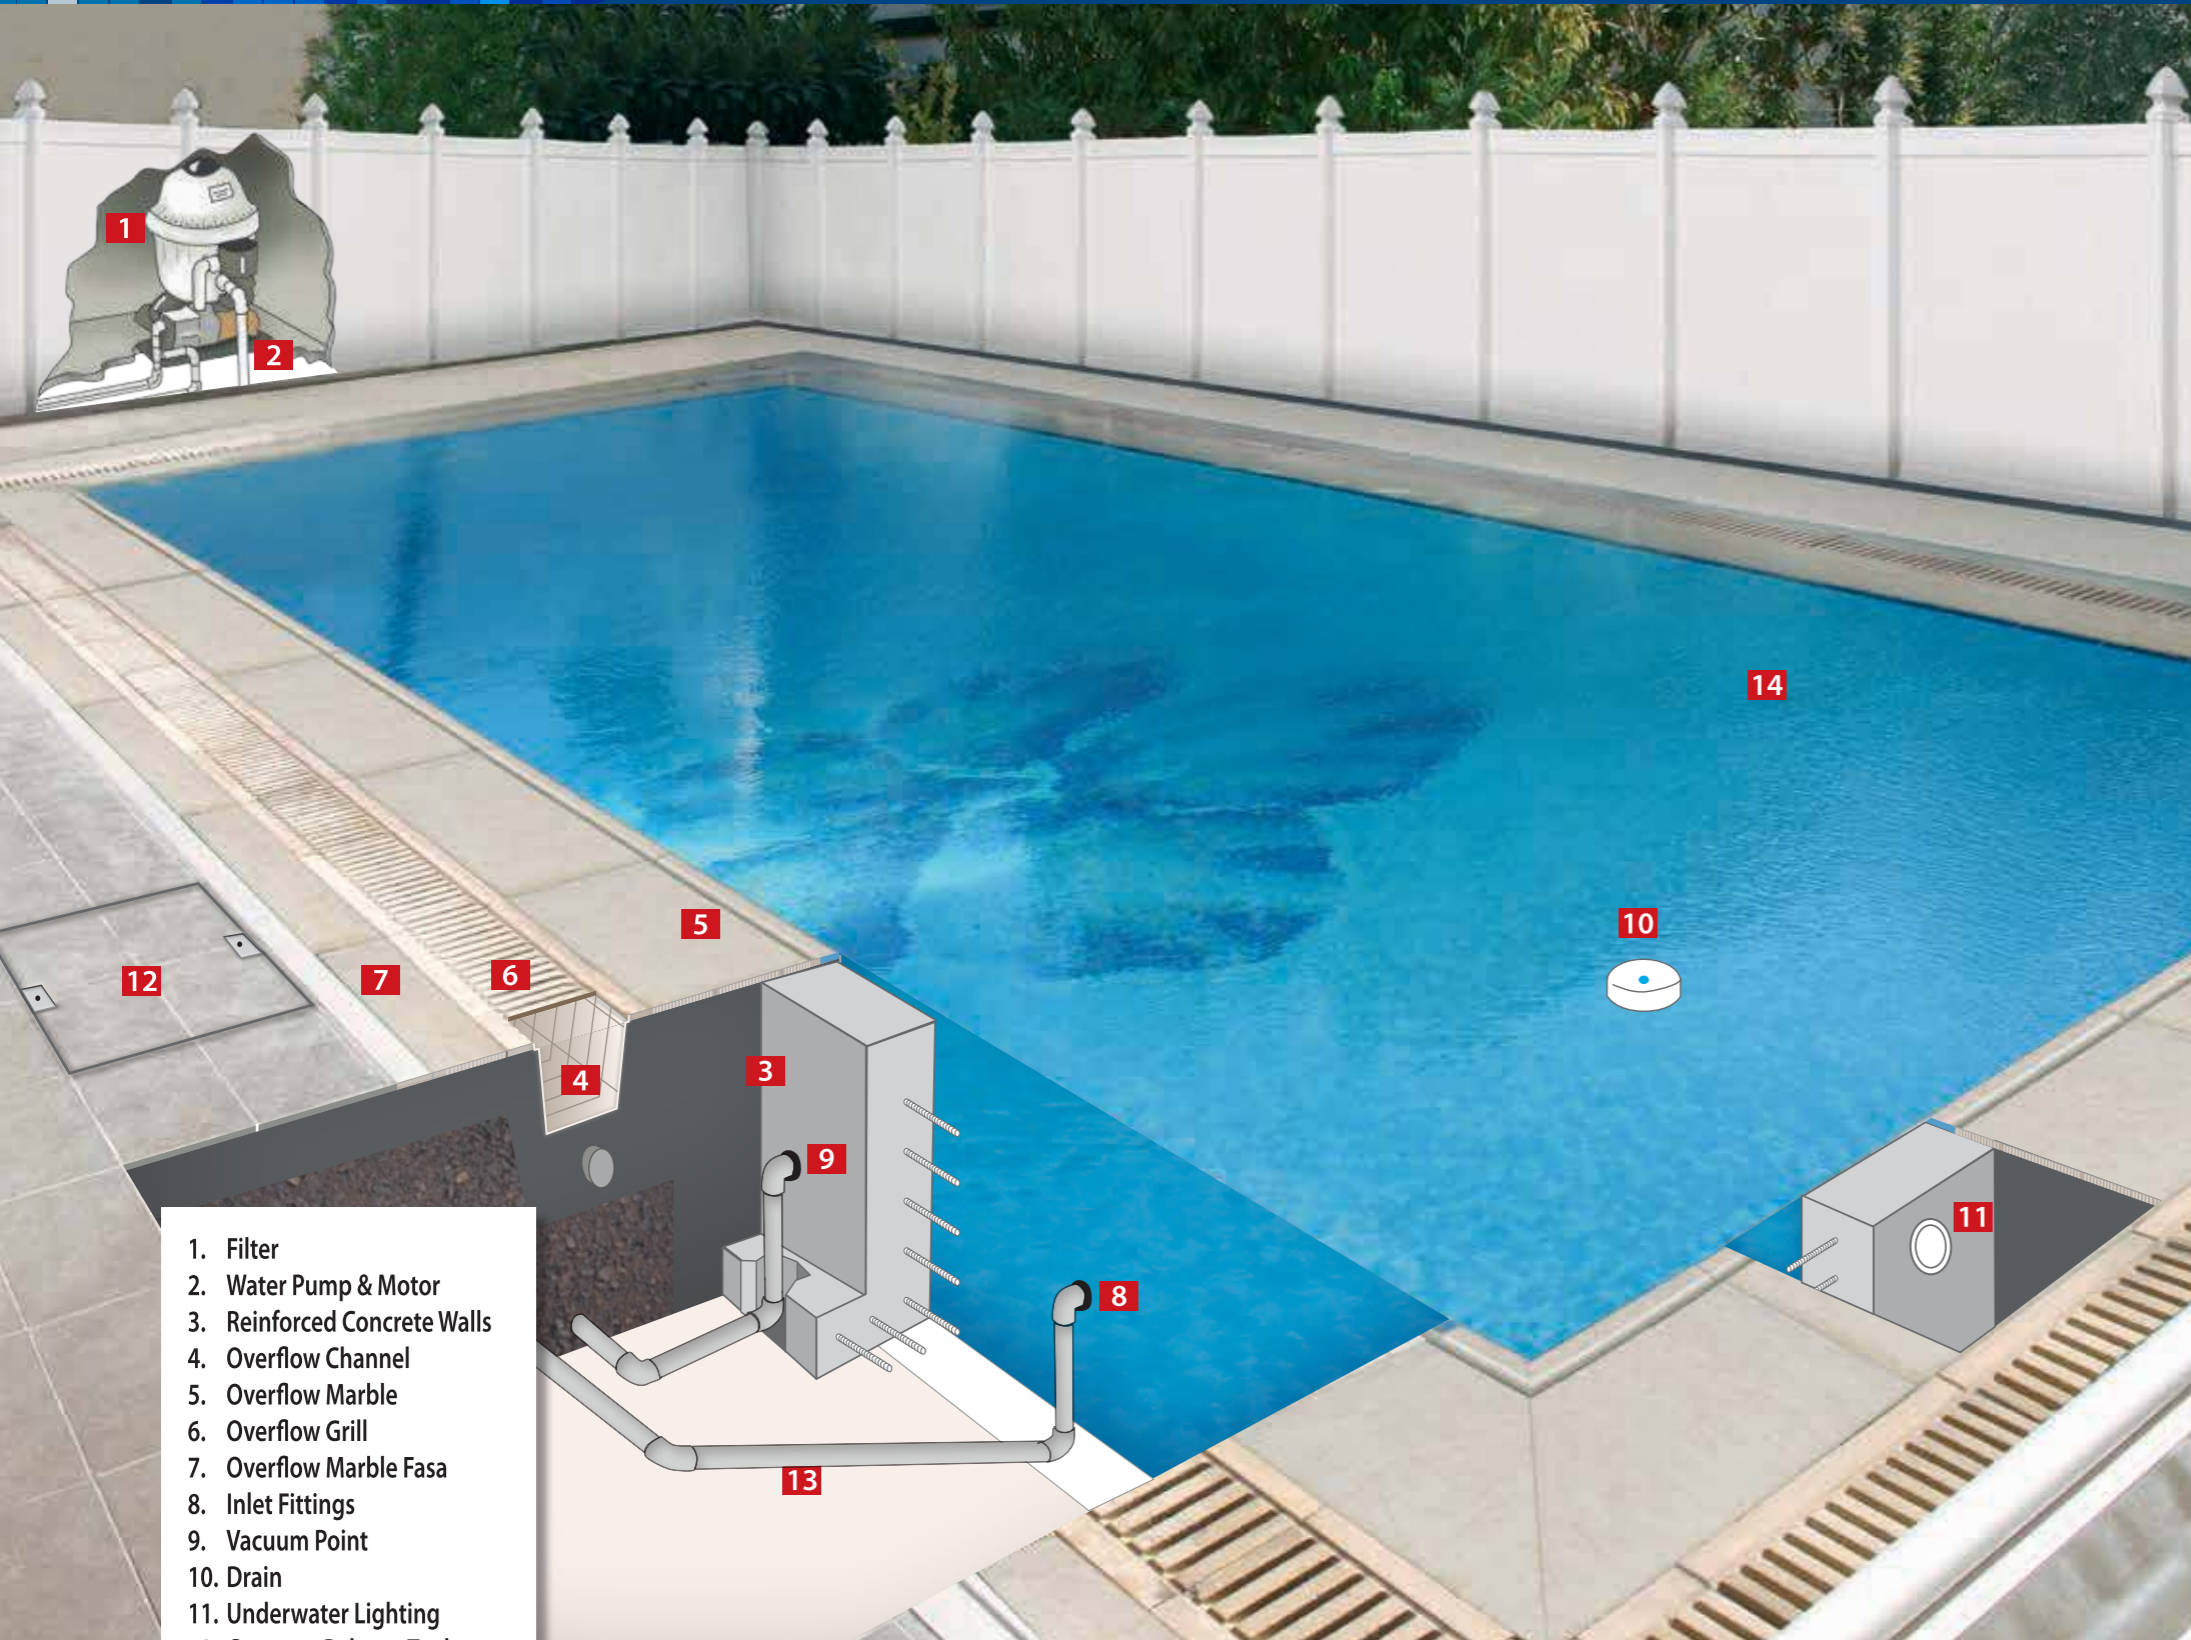

13. SAFETY FLOAT LINE

A major safety feature with all SARATOGA pools is the safety float line which separates the shallow area from the deep area of your pool. A properly installed safety float line should remain in your pool at all times.

14. PVC MEMBRANE

SARATOGA pools are available with a 1.5mm PVC Membrane treated against micro-organism attacks, and U.V. degradation.

1. FILTER

Saratoga swimming pool is equipped with sand filter offering efficiency and outstanding water clarity.

2. WATER PUMP & MOTOR

The heart of the pool system is the water pump. Saratoga pumps are efficient, convenient, reliable and so silent that they often go unnoticed.

3. REINFORCED CONCRETE WALL

The 50cm of Saratoga monolithic reinforced concrete offers strength and long lasting life.

4. OVERFLOW CHANNEL

A concrete moulded channel around the pool which gathers water and dust, and then sends it back to the machinery for refining.

5. OVERFLOW MARBLE

Gives out a nice feeling and adds finesse to the pool.

6. OVERFLOW GRILL

It allows water to go through and into the channel. It could be made out of PVC or Marble.

7. FASA

It is the third piece of marble (set). It is placed between the pool and the cement paver. It gives out a nice look.

8. INLET FITTINGS

Fully adjustable wall fittings that direct the filtered water flow to any area of the pool for proper circulation.

9. VACUUM POINT

The point where a pipe can penetrate and the pool can be cleaned manually.

10. BOTTOM DRAIN

To maximize water flow and circulation, a bottom drain is added to the pool.

11. UNDERWATER LIGHTING

Pool lighting can give you more time to swim safely in your pool and create a great ambience at night. We have a range of products that will brighten up your pool in the dark and give it a luxury and a sophisticated look.

12. BALANCE TANK

An underground tank, where the water ends up before reaching the engine room. It is made out of concrete for better resistance

13. HIGH PRESSURE PIPES

They transfer water to and from the engine room underground.

14. PVC MEMBRANE or CERAMIC

SARATOGA pools are available with 1.5mm PVC Membrane treatment against microorganism attacks and U.V. degradation. We also offer a collection of ceramics.

The material which is used to line the walls and the bottom of the SARATOGA pool is the most ideal for the purpose. It is made of PVC membrane, a material almost in corruptible, and it has very low maintenance needs. This PVC membrane has a completely smooth surface, and it is treated against micro - organism attacks and U.V. degradation.

Since it has a perfectly smooth surface it makes the cleaning of a SARATOGA pool an easy to accomplish task. It does not absorb any water at all since its surface is a non - porous one, and it tightly fits with the water filtering equipment so as to guarantee 100% absolute waterproof surfaces. Finally you may choose from a variety of designs and colours in PVC membrane to make sure that your SARATOGA pool is a fine piece of art.
