Czech quality spa experience

HANSCRAFT builds upon more than 15 years of hands-on experience with importing, reselling and maintenance of premium hot tubs. Thanks to this experience we take care to design products that are comfortable to use while being harmless to health, extremely durable and defectless.

SPA EXPERIENCE ACCESSIBLE TO EVERYONE

We believe that relaxation is an important part of a healthy balanced lifestyle. Our hot tubs therefore offer a premium quality spa experience that is affordable for families with children, active sportsmen as well as couples, that want to enjoy simple peaceful moments in each other's company.

DESIGNED FOR BODY AND SOUL

Martin Prochazka, MSc., the physiotherapist of Czech leading sportsmen, oversees that all our hot tubs enable the body to assume natural position and receive a truly effective massage.

DESIGN WORTH SHOWING OFF

Your eyes will be as delighted as your body. The modern shapes and appealing cabinet of our bath tubs, designed by Ondrej Kamenicky, M.Arch., will upgrade and complete the exterior of any garden.

MINDFUL OF HEALTH AND NATURE

Always keeping the environment in mind, we select only the highest quality materials harmless to both health and nature. On top of that we recycle all of the leftover materials and introduce it back to the manufacturing process. That makes us a close to zero-waste company (97%).

WORLD CLASS LEAGUE

We pay attention to the smallest details. Thanks to first-class materials and precise execution, we can guarantee an extreme durability of all our hot tubs. Each product undergoes a strict testing in real life circumstances which helps us to eliminate 99% of possible defects and malfunctions.

MANUFACTURED AND DELIVERED IN 4 WEEKS

Have you already selected the best suitable hot tub for you? Good news is that you will not have to wait too long to enjoy it at home. We will deliver your hot tub in just four weeks from acceptance of the binding order.

YOUR COMFORT IS OUR COMMAND

Our design process is heavily influenced by Martin Prochazka, MSc., the physiotherapist of Czech leading sportsmen, who oversees that all our hot tubs always offer both a comfortable and highly effective massage. They will further charm you with their modern, appealing appearance, designed by Ondrej Kamenicky, M.Arch.

WE ALWAYS CHOOSE THE GREEN WAY

Instead of using shell lamination which creates harmful styrenes as a by-product, we use high quality GreenShield materials. They are completely harmless to both health and nature. On top of that we recycle all of the leftover material and introduce it back to the manufacturing process. That makes us a close to zero-waste company (97%).

PRECISE EXECUTION OF EVERY DETAIL

We work with the latest technology and machinery, currently also used in automotive, aircraft and arms industry. That enables us to be precise to a hundredth of a millimeter. Precision and quality are areas which we never compromise in.

STRICT QUALITY TESTING BEFORE SHIPMENT

Not one hot tub leaves our manufacture hall without a series of strict and thorough testing procedures. We test all our products in real life circumstances which allows us to eliminate 99% of possible defects and malfunctions. We are also inspired by the hardline quality control of TPS (Toyota Production System).

OKA DESIGN

oka design

Discover the OKA design hot tubs, exclusively designed by the architect Ondrej Kamenicky. Their distinctive lines and ergonomic layout will provide you with utmost comfort and an efficient hydrotherapeutic massage. All tubs are spacious enough even for people of taller stature.

EXTENSIVE STANDARD EQUIPMENT

The standard equipment includes a colour LED lighting, LED backlit jets, anatomical headrests, AIR X® jets, waterfall, control system, ozonator and UV sanitizer titanium water heating, thermal cover, cover lift, steps, durable side panels and an Aquatic Sound System incl. a subwoofer.

For additional fee you can order a WiFi module that allows you to connect the bath tub to your smartphone and regulate the intensity of the massage. You can also upgrade your equipment with MicroSilk hydrotherapy specializing in skin regeneration and clearing.

UNIQUE DESIGN

OKA Design hot tubs are inspired by the modern shapes of an automotive industry. The cabinets are made out of boards intended for exterior coatings of extreme longevity. You can choose your preferred design from a selection of emulated modern and traditional materials.

HIGH QUALITY SHELL WITH AN EXTREME DURABILITY

The inner shell is made out of a fully recyclable GreenShield material stiffened by an in-between layer of ABS for better longevity. It is further thermally insulated with Arctic+ and a reflexive ALU material that protects the hot tub from challenging winter weather conditions.

The outer shell is made out of an american acrylite Lucite and is available in 7 colour options.

Thanks to these carefully selected first-class materials and strict testing of finished products, we can guarantee an extreme durability, longevity and defectlessness of every hot tub.

**Green
Shield**

The italian material GreenShield is a 100% recyclable and completely harmless to health.

HC DESIGN

HANSCRAFT

Elegant rounded edges and precision to the smallest detail. That is how we would describe the hot tubs from the HC Design product line. Their ergonomic design provides utmost comfort and a highly effective hydrotherapeutic massage. All tubs are spacious enough even for people of taller stature.

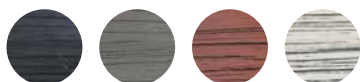

EXTENSIVE STANDARD EQUIPMENT

The standard equipment includes a colour LED lighting, LED backlit jets, anatomical headrests, AIR X® jets, waterfall, control system, ozonator and UV sanitizer titanium water heating, thermal cover, cover lift, steps, durable side panels and an Aquatic Sound System incl. a subwoofer.

For additional fee you can order a WiFi module that allows you to connect the bath tub to your smartphone and regulate the intensity of the massage. You can also upgrade your equipment with MicroSilk hydrotherapy specializing in skin regeneration and clearing.

UNIQUE DESIGN

The HC Design hot tubs are easily distinguished by their round edges and cabinet boards evoking a beautiful wooden texture. It is a significantly durable material, available in 4 colour options.

HIGH QUALITY SHELL WITH AN EXTREME DURABILITY

The inner shell is made out of a fully recyclable GreenShield material stiffened by an in-between layer of ABS for better longevity. It is further thermally insulated with Arctic+ and a reflexive ALU material that protects the hot tub from challenging winter weather conditions.

The outer shell is made out of an american acrylite Lucite and is available in 7 colour options.

Thanks to these carefully selected first-class materials and strict testing of finished products, we can guarantee an extreme durability, longevity and defectlessness of every hot tub.

**Green
Shield**

The italian material GreenShield is a 100% recyclable and completely harmless to health.
